

**REMARKS**

Responsive to the requirement for restriction, applicant elects Group I, claims 13-18, drawn to the cleaning system.

Responsive to the requirement for election of species, Applicant previously elected the Fifth species, that of Figure 3, with the engine heat exchanger 325 omitted.

It is believed that claims 13-18 are readable on the elected species.

The designation of readability of the claims is made in connection with page 8, lines 23-29, in which it is pointed out that the heating device 355 may be the only source of heat, but also may be present in addition to the heat exchanger 325. Therefore, those claims which mention the heat exchanger 325 do not preclude the embodiment in which heating device 355 is present. It is only claims that specifically recite that 325 is not present, that would not be readable on the elected embodiment; and as we read the claims now in the case, we do not find any such preclusive claim.

An action in the merits is accordingly respectfully submitted.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any

additional fees required under 37 C.F.R. § 1.16 or under 37  
C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON
